PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience building and running production AI, automation and full-stack systems end to end. At Spinify.AI, promoted from Associate to Software Engineer as the sole developer on a live SaaS product, owning LLM-powered agents (Google ADK, Gemini), Python/FastAPI and Node.js services, PostgreSQL data models, Docker, CI/CD and production support. Currently freelancing as the UI/UX designer and frontend developer for Macrostays, a furnished apartment rental platform, building an SEO-first React frontend directly with the client. Delivered 40% faster page loads, 35% faster deployments and ~30% lower AI response latency.

TECHNICAL SKILLS

- **AI and LLM:** Google ADK, Gemini, AI agents, tool calling, intent classification, prompt engineering, prompt caching, Claude Code, OpenAI Codex
- **Languages:** Python, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend:** FastAPI, Node.js, Express, REST APIs, WebSockets
- **Database:** PostgreSQL, SQL
- **Frontend:** React.js (19), Next.js, React Router v7, Redux, React Flow, Tailwind CSS, shadcn/ui, Material UI, SEO
- **DevOps and Testing:** Docker, CI/CD, Git/GitHub, Jira, React Testing Library, Chrome DevTools
- **Design:** Figma

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer & UI/UX Designer | Macrostays (Client) Oct 2026 – Present
Remote

- Sole UI/UX designer and frontend developer for a furnished apartment rental platform for long stays and corporate housing, working directly with the client.
- Designed wireframes and high-fidelity screens in Figma, focused on a smooth search and booking experience.
- Building an SEO-first frontend in React 19, TypeScript, Tailwind CSS v4 and shadcn/ui, with server-side rendering and pre-rendering via React Router v7.

Software Engineer | Spinify.AI Apr 2026 – Oct 2026
Remote (Noida)

- Promoted after two years as Associate; led LLM-powered conversational workflow features on Google ADK and Gemini, now serving live users and reducing support tickets.
- Cut average AI response latency by ~30% through async response handling and prompt caching.
- Designed FastAPI workflows for long-running requests with async processing and structured errors; built real-time WebSocket dashboards.
- Reviewed code, mentored junior developers on React and API integration, and worked with business stakeholders to turn requirements into shipped features.

Associate Software Engineer | Spinify.AI Apr 2024 – Mar 2026
Remote (Noida)

- Sole developer on the product: shipped 10+ production features end to end, from design through deployment and support.
- Designed 15+ REST endpoints in Python/FastAPI and Node.js with structured error handling.
- Refactored data fetching and API payloads, cutting initial page load by 40% and LCP by 1.2 s.
- Set up Docker-based dev environments and contributed to CI/CD pipelines, cutting deployment time by 35%.
- Delivered the full frontend of RentEase, a B2C booking platform for bikes, cars and homestays, with a real-time WebSocket support chatbot; won an Instant Award.
- Built a secure Razorpay checkout end to end (webhooks, payment verification, React UI) and a real-time audio pipeline (React, WebRTC, Janus Gateway).

React and Frontend Integration Intern | Spinify.AI Jan 2024 – Mar 2024
Noida

- Built 8+ reusable React components and optimized async API data flows, cutting unnecessary re-renders by 20%.

SQL Developer Intern | Celebal Technologies Jun 2023 – Aug 2023

Jaipur

- Rewrote and indexed SQL queries behind reporting dashboards for 500+ daily active users, improving data retrieval speed by 25%; contributed to schema design on 3 internal projects.

PROJECTS

AdmitAI: AI Agent for Admission Automation Python, FastAPI, Google ADK, Gemini, React.js

- Built an AI agent that automates student admissions end to end, using Google ADK and Gemini behind a FastAPI backend and React.js frontend.
- Implemented intent classification, tool calling and YAML-driven workflows to collect applicant details and guide users step by step.

CallCanvas: Visual Call-Flow Designer React.js, React Flow, Redux

- Built a drag-and-drop designer for voice-bot conversations with custom node types, editable edge labels and attachable call-state nodes.
- Added JSON import/export, inline editing, box-select, zoom and keyboard shortcuts so flows can be saved, shared and reloaded.

3D Talking Avatar: Virtual Agent Interface React.js, Three.js, Web Speech API

- Rendered an interactive 3D avatar with real-time speech synthesis, turning text chat into a face-to-face style conversation at a steady 60 fps on mid-range devices.

EDUCATION

Master of Computer Applications (MCA) | Lovely Professional University, Phagwara 2022 – 2024

CGPA: 9.5/10

B.Sc. Computer Programming and Applications | CSJM University, Kanpur 2019 – 2022

CGPA: 8.7/10

CERTIFICATIONS

Claude Code (Anthropic) | Docker Prerequisites (KodeKloud) | Meta Front-End Developer Professional Certificate (Coursera)
